Session	Session Coverage	MindPro Modules
1	Programme Introduction	Training Orientation
	<ul> <li>History of Lean</li> </ul>	<ul> <li>M06 Value Focus</li> </ul>
	<ul> <li>Concept of Value</li> </ul>	<ul> <li>M07 Lean Practices</li> </ul>
	<ul> <li>3Ms (Muda, Mura, Muri)</li> </ul>	
	Five Lean Principles	
	<ul> <li>Eleven Types of Muda &amp; Examples</li> </ul>	
	<ul> <li>Case Study</li> </ul>	
	<ul><li>Equity vs Equality</li><li>History of Six Sigma</li></ul>	<ul> <li>M01 Breakthrough Vision</li> </ul>
	<ul> <li>Understanding Mura (Variation)</li> </ul>	<ul> <li>MO2 Business Principles</li> </ul>
2	<ul> <li>Lean Six Sigma</li> </ul>	<ul> <li>M02 Dusiness Finicipies</li> <li>M03 Process Management</li> </ul>
	<ul> <li>Lean Six Sigma Roles</li> </ul>	<ul> <li>M04 Installation Guidelines</li> </ul>
	<ul> <li>Role of a Black Belt &amp; Competencies (ISO 18404)</li> </ul>	<ul> <li>M09 Basic Statistics</li> </ul>
	Basic Statistics	
	<ul> <li>Understanding Six Sigma</li> </ul>	<ul> <li>M01 Breakthrough Vision</li> </ul>
	<ul> <li>Approaches to reduce 3Ms</li> </ul>	<ul> <li>M05 Application Projects</li> </ul>
	<ul> <li>DMAIC methodology, The Logic equation</li> </ul>	<ul> <li>M17 Survey Methods</li> </ul>
	<ul> <li>Understanding Data Types &amp; Graphical Representation</li> </ul>	<ul> <li>M08 Quality Tools</li> </ul>
2	<ul> <li>DMAIC Steps (ISO 13053-2:2011)</li> </ul>	
3	Define Phase	
	Step 1 (Define) - Identify the customers and the third parties, understand their	r demands and translate them into measurable
	requirements. Set improvement objectives. (4.1.2.1)	
	<ul> <li>Understanding Customer &amp; Voices</li> </ul>	
	<ul> <li>Customer Feedback , Affinity Diagram</li> </ul>	
	Kano Model	<ul> <li>M08 Quality Tools</li> </ul>
	<ul> <li>House of Quality (QFD)</li> </ul>	<ul> <li>Mod Quanty roots</li> <li>M20 DFSS Methods</li> </ul>
4	<ul> <li>CTQ Drill down, AHP</li> </ul>	
	<ul> <li>Project Profitability Assessment (ROI, NPV)</li> </ul>	
	Hoshin Planning	<ul> <li>M05 Application Projects</li> </ul>
	Step 2 (Define) - Define and set down the team objectives for the project: deal	
	investment, competencies and scope of the project. (4.1.2.2)	
5	Project Charter	<ul> <li>M08 Quality Tools</li> </ul>
5	Elevator Speech	
	<ul> <li>Selecting Team members (Belbin, MBTI, Tuckman's)</li> </ul>	
	<ul> <li>Allocating Roles &amp; Responsibilities (RACI, ARMI)</li> </ul>	
	<ul> <li>Stakeholder Analysis &amp; Influence mapping</li> </ul>	<ul> <li>M08 Quality Tools</li> </ul>
	Step 3 (Define) - Characterize the activity or the process. (4.1.2.3)	
6	<ul> <li>Process mapping – Levels of mapping</li> </ul>	<ul> <li>M03 Process management</li> </ul>
U	<ul> <li>SIPOC</li> </ul>	······································
	<ul> <li>Flow Chart, Deployment Flow Chart</li> </ul>	
	<ul> <li>Value Stream Mapping</li> </ul>	<ul> <li>M06 Value Focus</li> </ul>
-	<ul> <li>Yamazumi, Spaghetti Diagram, A3</li> </ul>	<ul> <li>M07 Lean Practices</li> </ul>
	<ul> <li>Introduction to iGrafx Flow Charter</li> </ul>	<ul> <li>M08 Quality Tools</li> </ul>
		<ul> <li>M20 DFSS Methods</li> </ul>
	<ul> <li>Introduction to TPM</li> </ul>	<ul> <li>M08 Quality Tools</li> </ul>
	Measure Phase	
	Step 4 (Measure) - Take the measurable requirements (Y) and select one or m	
8	Step 5 (Measure) - Define the data to be collected in order to pinpoint the pro	
	5W1H, Five Why's	<ul> <li>M08 Quality Tools</li> </ul>
	Fishbone Diagram	
	FMEA	
	<ul> <li>Initial Prioritization of Causes (Voting, C&amp; E Control Impact matrix)</li> </ul>	
	Step 6 (Measure) - Double-check the fitness of the metrics selected. (4.2.2.3)	
	<ul> <li>Measurement System Analysis - Introduction</li> </ul>	<ul> <li>M21 Measurement Analysis</li> </ul>

	<ul> <li>Attribute R &amp; R</li> </ul>	<ul> <li>M21 Measurement Analysis</li> </ul>
9	<ul> <li>Gage R &amp; R</li> </ul>	
	Step 7 (Measure) - Develop a stratified data collection (X and Y ) plan (4.2.2.4)	
9	<ul> <li>Data Collection Plan, Operational Definition</li> </ul>	
	Sampling Strategy & Bias	M11 Discusto Constall'Ite
10	Sample Size Calculation	<ul> <li>M11 Discrete Capability</li> </ul>
	Step 8 (Measure) - Understand and validate the data (4.2.2.5) Pareto Chart	- M12 Lhurothesis Testing
	Pareto Chart     Box Plot	<ul> <li>M12 Hypothesis Testing</li> <li>M08 Quality Tools</li> </ul>
	Step 9 (Measure) - Measure process performance and/or process capability. (4.2.	
	<ul> <li>Process Capability Determination - Discrete</li> </ul>	<ul> <li>M03 Process Management</li> </ul>
	Run Chart	<ul> <li>Mos Process Management</li> <li>M20 DFSS Methods</li> </ul>
	Anatomy of Defects Opportunity	
	DPMO Calculation, Z Conversion	
	<ul> <li>Process Capability Determination - Continuous</li> </ul>	M21 Measurement Analysis
	Individual Distribution Identification	M12 Hypothesis Testing
	Cp, Cpk, Pp, Ppk	<ul> <li>M10 Continuous Capability</li> </ul>
	Step 10 (Measure) - Confirm or readjust the improvement objectives	
11	Analyze Phase	
<b>' '</b>	Step 11 (Analyze) - Analyze the process to pinpoint non value-adding activities o	r activities that need improvement. (4.3.2.1)
	Step 12 (Analyze) - Chart potential links between X and Y. (4.3.2.2)	
	Step 13 (Analyze) - Quantify the impact of key process variables X and their pote	ntial Interaction (4.3.2.3)
	Introduction to Hypothesis Testing	
	Analysis Planning & Test selection	<ul> <li>M12 Hypothesis Testing</li> </ul>
	Null & Alternate Hypothesis	M13 Confidence Intervals
12	• 2t Test	<ul> <li>M15 Parametric Methods</li> </ul>
	One-way ANOVA Test	<ul> <li>M18 Nonparametric Methods</li> </ul>
	<ul> <li>Mann-Whitney Test</li> </ul>	
	<ul> <li>Moods Median Test</li> </ul>	
	2 Variance Test	<ul> <li>M12 Hypothesis Testing</li> </ul>
10	<ul> <li>Test for Equal Variance Test</li> </ul>	<ul> <li>M13 Confidence Intervals</li> </ul>
13	2P Test	<ul> <li>M15 Parametric Methods</li> </ul>
	Chi square Test	<ul> <li>M18 Nonparametric Methods</li> </ul>
	<ul> <li>1t, Wilcoxon, 1P and 1 Variance Test</li> </ul>	<ul> <li>M16 Chi square Methods</li> </ul>
	Linear Regression	<ul> <li>M15 Parametric Methods</li> </ul>
	<ul> <li>Multiple Regression</li> </ul>	<ul> <li>M19 Experimental Methods</li> </ul>
	<ul> <li>Multicollinearity</li> </ul>	
14	<ul> <li>Binary Logistic Regression</li> </ul>	
	<ul> <li>Main Effects Plot</li> </ul>	
	<ul> <li>Interaction Plot</li> </ul>	
	Matrix Plot	
	Step 14 (Analyze) - Further refine the assessed impact of key process variables by	employing an experimental approach to find
	new factors. (4.3.2.4)	employing an experimental approach to find
	<ul> <li>Introduction to Design of Experiments</li> </ul>	<ul> <li>M19 Experimental Methods</li> </ul>
1 Г	Full Factorial Experiments	into Experimental methods
15		
	Response Optimization	
	<ul> <li>Fractional Factorial Experiments</li> </ul>	
	<ul> <li>Introduction to RSM</li> </ul>	
	Improve Phase	
	Step 15 (Improve) - Determine the target process. (4.4.2.1)	
	Step 16 (Improve) - Generate solution ideas/redesign. (4.4.2.2)	
10	Step 17 (Improve) - Test . (4.4.2.3)	
	Ideation Tools	<ul> <li>M08 Quality Tools</li> </ul>
16		
	<ul> <li>SCAMPER</li> </ul>	
	<ul><li>SCAMPER</li><li>Brainstorming, Brainwriting</li></ul>	

	<ul> <li>Assumption Busting, Process benchmarking</li> </ul>	
	<ul> <li>Random Stimulus, TRIZ</li> </ul>	
	<ul> <li>Application of Lean Tools e.g. 6S+, ECRS</li> </ul>	
	Step 18 (Improve) - Assess the Risks . (4.4.2.4)	
17	Step 19 (Improve) - Select . (4.4.2.5)	
	<ul> <li>Prioritization Tools</li> </ul>	
	<ul> <li>Criteria-based matrix</li> </ul>	
	<ul> <li>Pay-off matrix</li> </ul>	
	<ul> <li>N/3 voting</li> </ul>	
	<ul> <li>Six thinking hats</li> </ul>	
	<ul> <li>Paired comparison &amp; Pugh matrix</li> </ul>	
	Step 20 (Improve) - Organize solution deployment . (4.4.2.6)	
	Step 21 (Improve) - Implement . (4.4.2.7)	
	Control Phase	
	Step 22 (Control) - Update the control plan (4.5.2.1)	
	<ul> <li>Process Control Plan</li> </ul>	<ul> <li>M08 Quality Tools</li> </ul>
	<ul> <li>Poka Yoke</li> </ul>	
	Step 23 - (Control) Document the best-practice activities (4.5.2.2)	
	Step 24 - (Control) - Implement solution monitoring (4.5.2.3)	
	<ul> <li>Control Charts Selection</li> </ul>	<ul> <li>M08 Quality Tools</li> </ul>
	Continuous Control Charts	<ul> <li>M14 Control Methods</li> </ul>
10	<ul> <li>I – MR chart</li> </ul>	
18	<ul> <li>X bar – R chart &amp; X bar - S chart</li> </ul>	
	<ul> <li>Discrete Control Charts</li> </ul>	
	<ul> <li>Defects Charts – C charts &amp; U chart</li> </ul>	
	<ul> <li>Defective Charts – P and nP Charts</li> </ul>	
	<ul> <li>OCAP</li> </ul>	
	Step 25 (Control) - Double-check the improvement is effective and efficient (4.5.2	2.4)
	Step 26 (Control) - Capitalize on the lessons learned (4.5.2.5)	
	Step 27 (Control) - Institutionalization. (4.5.2.6)	
	Step 28 (Control) - Project closure and celebrate completion.(4.5.2.7)	
	Programme Feedback
